50X1-HUM

1. The power station at Poznan (Posen) is located on the right bank of the Warta River, approximately 50 m. east of the river and 50 m. north of the Poznan - Gniezno railway line. The present installed power of 35 MW will be increased to 65 MW. Effective power amounts to 70 percent of the installed power. The power station is equipped with two turbo-generators, one of 15 MW, the other of 20 MW capacity. The boilers operate under 28 atmospheres steam pressure. The transformer station distributes current at 6,000, 15,000 and 30,000 volts. This power station supplies the town and the district of Poznan.
